Education

National University of Singapore **Aug 2025 - May 2029**

Bachelor of Computing in Computer Science with 2nd Major in Mathematics

- GPA: 4.78/5.0
- Data Structures & Algorithms, Discrete Mathematics, Linear Algebra, Software Engineering

Experience

NUS, Teaching Assistant **Aug 2026 - Present**

- Led weekly CS1101S programming tutorials for 8 students, preparing course-aligned materials and providing timely feedback on weekly assignments to reinforce programming fundamentals and computational problem-solving skills in SICPy, a Python-based teaching language.

NUS Youth Education Project (YEP) to Vietnam, Treasurer **Sep 2025 - May 2026**

- Developed a custom point-of-sale and inventory management system in Google Sheets using Google Apps Script and JavaScript, automating order entry, pricing, bundle discounts, stock tracking, and sales consolidation across multiple fundraising days supporting over SGD 8,500 raised.

Singapore Armed Forces, Technician **Feb 2023 - Jan 2025**

- Created a Telegram Bot with Telegram Bot API and Google Apps Script to manage and track maintenance records of over 100 vehicles, improving record retrieval and daily servicing workflows. Helped to reduce late maintenance by 50%.

Projects

Modulo - Companion App for Students

- Built, in a team of 2, an Android app and companion website for managing timetables, tasks and study sessions, with Google Drive API and JSON-based sync across platforms.
- Scoped features through 6 user stories and verified them with 180 tests. Performed testing with actual students to gather feedback for improvements

Pursuit - AI Learning Platform for Singapore Students (In progress)

- Building an EdTech platform that unifies Singapore's education tools with an AI tutor trained on the Singapore syllabus for students and teachers.
- Prioritised the AI tutor and chat interface as the core product, informed by a survey of 3 teachers and 15 students on current education software; user testing planned for next school year.
- Designed the system architecture and frontend-backend API (Angular, Django); led UI/UX, product design and branding.

PneuRelief - Cast Pressure-Relief Companion App (In progress)

- Building a companion app for a smart cast that prevents pressure sores in elderly patients: pressure sensors detect high pressure and pneumatic balloons relieve it..
- In a 6-person software team within a 23-person project across mechanical, electrical, software and research; the app controls the balloons, sends pressure notifications, and stores and exports data, with a UI designed for elderly users and caregivers.
- Building with React, Electron (iOS/Android), Supabase and FastAPI; connects to the hardware over Bluetooth and is tested against a Bluetooth simulator.

Skills

- **Languages:** Java, C++, C#, C, Kotlin, JavaScript, TypeScript, SQL, Python
- **Web / Mobile:** React, HTML/CSS, Android
- **Tools / Platforms:** Git, Unity, Google Apps Script

Awards

- Champion for DSTA BrainHack TIL-AI Novice Category 2026
- NUS Dean’s List for AY 25/26 Semester 2
